Software Engineer

Professional Summary

Full Stack Developer with **5 years** of experience in web and mobile development across startup and SaaS environments. Led teams that achieved 40% increase in SEO rankings, 33% improvement in user retention, and 50% rise in user engagement. Expertise in end-to-end application development, API design, payment integrations, CI/CD pipelines, and agentic AI applications. Key contributor to GPAY fintech app in Cameroon.

TECHNICAL SKILLS

- **BackEnd:** Amazon S3, Amazon SQS, AWS Lambda, Express, Node.js, Go
- **FrontEnd:** Javascript, Next.js, React.js, Typescript, Vue.js
- **Mobile:** Flutter, Dart, Kotlin, Swift
- **Database:** Amazon DynamoDB, MongoDB, MySQL, PostgreSQL
- **Other:** Docker, Git, GitHub, GitLab, Jest, React Testing Library

WORK EXPERIENCE

Mamlaka Hub Spoke Limited • January 2025 - Present

Software Engineer

- Engineered secure fintech solutions for digital payments, mobile wallets, and high-volume transaction processing.
- Spearheaded backend development of the *GPAY* mobile fintech platform, enabling secure financial services for thousands of users in Cameroon.
- Designed and deployed scalable microservices and RESTful APIs, improving system reliability and accelerating feature delivery through CI/CD automation.
- Integrated payment gateways and implemented secure authentication, authorization, and transaction monitoring to safeguard financial operations.
- Optimized backend services and database performance, reducing API latency and enhancing overall application scalability.

Badili Africa • February 2024 - December 2024

Software Engineer

- Developed high-quality software architecture using React and TypeScript, improving code maintainability through strict code reviews and testing strategies.
- Collaborated with cross-functional teams within Agile environments; implemented comprehensive unit tests achieving 85% code coverage.

More Classifieds • June 2023 - December 2023

Software Engineer

- Developed Android/iOS apps enhancing business-to-vendor interaction; integrated Flutterwave payments leading to 50% decrease in transaction processing time.
- Deployed apps on Google Play Store and App Store; improved app performance via state management and caching optimizations.
- Designed and developed customer-facing website and company dashboards.

Move Fare Technologies • February 2021 - March 2023

FrontEnd Engineer

- Spearheaded development of Cashless Matatu Payment app, increasing cashless payments by 30% and contributing to 10% revenue growth.
- Integrated MPESA and Core Banking APIs for user top-up and real-time SACCO settlements.

PROJECTS

Pocket of Paradise

- Completely revamped front-end design using React.js, resulting in significant increase in conversion rates, user engagement, and overall site performance.
- Collaborated with cross-functional remote teams to develop analytics dashboard helping organizations track KPIs, user retention, and revenue metrics.

Jionee Medical

- Engineered a high-performance healthcare platform using Next.js and modern web technologies, optimizing SEO, user experience, and performance for mobile medical diagnostic services.
- Implemented secure online service booking, payment integration, and responsive interfaces, streamlining patient access to over 150 mobile diagnostic and radiology services across Kenya.
